

## Create user from command line

```
net user [UserName [Password | *] [options]] [/domain]
```

```
net user [UserName {Password | *} /add [options]  
[/domain]]
```

```
net user [UserName [/delete] [/domain]]
```

### Parameters

#### UserName

Specifies the name of the user account to add, delete, modify, or view. The name of the user account can have as many as 20 characters.

#### Password

Assigns or changes a password for the user's account.

Type an asterisk (\*) to produce a prompt for the password.

The password is not displayed when you type it at the password prompt.

#### /domain

Performs the operation on the domain controller in the computer's primary domain.

#### options

Specifies a command-line option. The following table lists valid command-line options that you can use.
